About Beyond

We Are on a MISSION...

BEYOND ENERGY
ANALYTICS

Beyond is part of a global information technology consultancy firm helping enterprises survive today's business disruptions through data driven digital transformation initiatives that really make the change happen.

Approach & Methodology

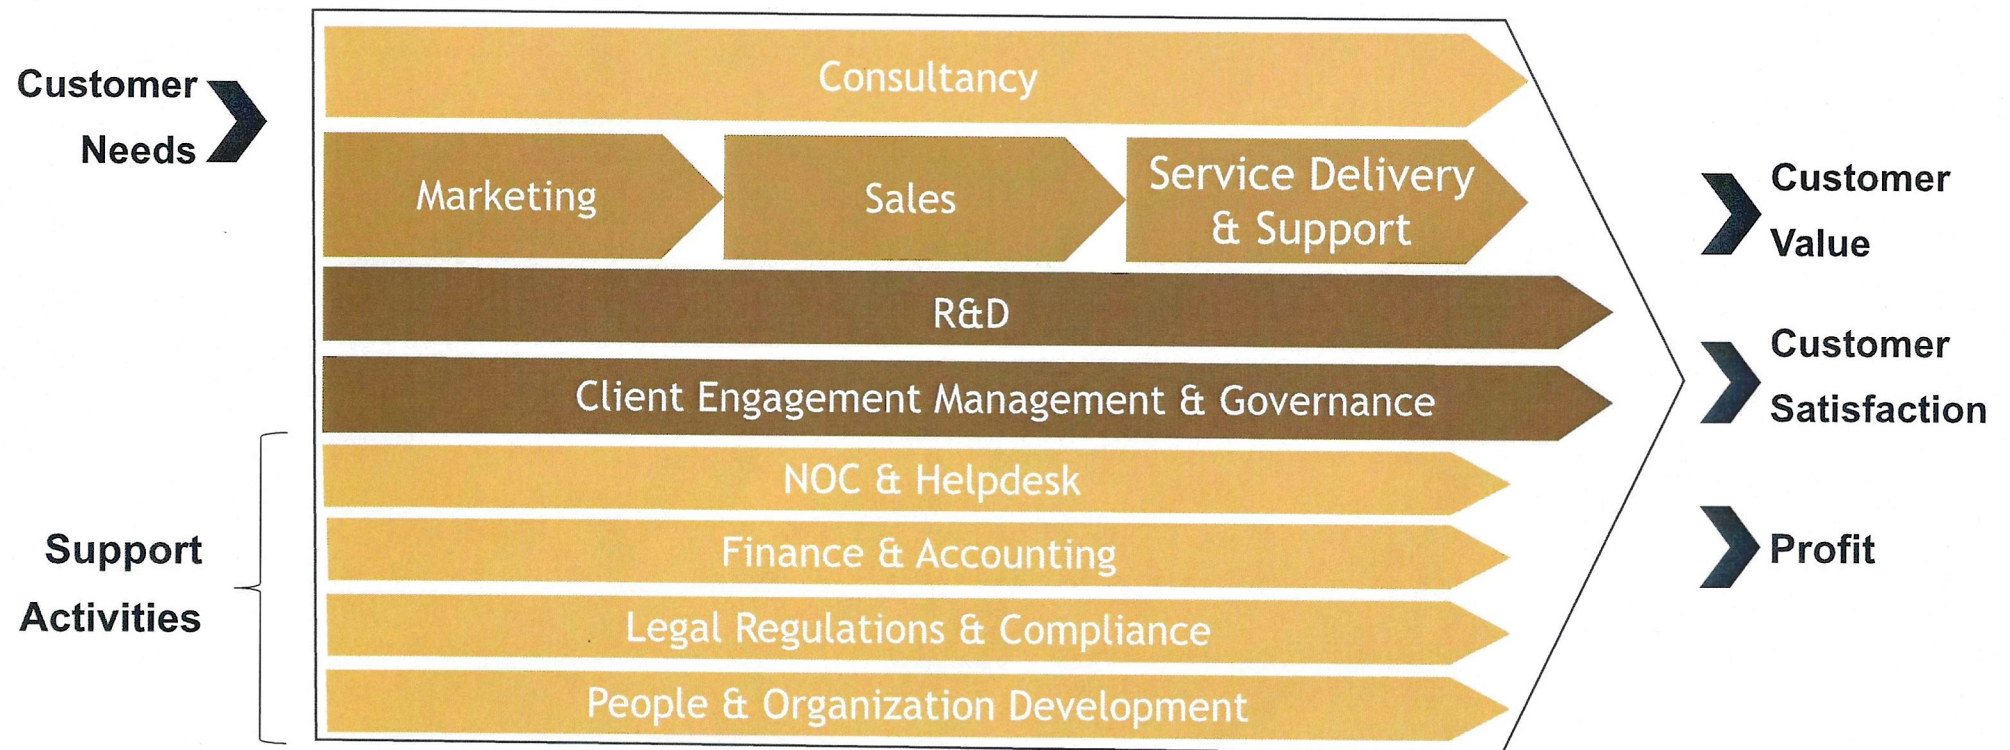

Customer Centric Framework

With a customer-centric mindset, we build strategies and provide solutions while focusing on multiple aspects of the transformation journey.

- Gaining senior management buy-in by defining real value.
- Digitalizing the core business.
- Leveraging scalable infrastructures
- Treating security as an integral part of the whole process.
- Utilizing the latest technologies like AI and Block chain
- Turning data into actionable insights

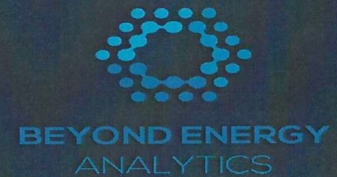

The customer centric framework is reflected on every aspect of our business operations as illustrated below. The most important input is customer needs, and our utmost objective is to deliver customer value.

About Beyond

Technology Partners

Our partnerships with leading technology vendors help us deliver world-class solutions and services to the businesses looking for exploiting the opportunities of digital transformation.

Solutions & Services

Digital transformation of businesses involves organizations' products, services, engagement with employees, and customers, partner, new business models, managing and even the purpose and methods of business itself!

DATA IS THE NEW CATALYST FOR CHANGE:
Driving new business models, novel ways of working and a new world of communication & collaboration.

Our References

Some of our references with government entities in UAE:

- **Abu Dhabi Department of Culture and Tourism**: Built a complete and centralized data analytics platform on hybrid cloud to enable DCT to have a complete view on all cultural and tourism data. Implemented Robotic Process Automation for finance and customer care processes and activities. Developed a complete visitor mobile app with all integration and back-end capabilities.
- **Smart Dubai Government**: Deployed the data contract compliance tool to enable the government to fully automate the complete onboarding process to acquire new data from other Dubai government entities. The new data acquisition is governed automatically on this tool
- **Federal Competitive and Statics Authority**: Developed and deployed a centralized enterprise data platform to capture multiple data sets from other government entities and build multiple statistical dashboards and KPIs per FCSA requirements and strategy.
- **Sharjah Government – DHR**: Built and deployed a enterprise data management solution to integrated and process data from several operational systems such as ERP, Web, Mobile App and internal systems.
- **UAE Armed – GHQ**: Developed the required modules to provide a full data masking and encryption in the different systems used by GHQ and reach full security compliance.
